

A range of Accessories is available for your Scanstrut installation. From mounting an additional light or GPS Antenna to accessories which aid installation and performance.

### Nav Light Mount

Install a navigation light above the radar for maximum visibility and performance.

Attach using radar mounting bolts, no extra fastenings required. Only compatible as part of a radome installation. Pre-drilled to fit Perko 200, Aqua Signal 25 & 40 series.

### Deck Flood Light

High performance, 55W sealed beam halogen deck light.

Pre-wired for simple installation and mounts using own set of clamps.

### GPS/VHF Antenna Mount

Install GPS or VHF antennas above the radar for maximum visibility and performance.

Attach using radar mounting bolts, no extra fastenings required. (1" x 14 tpi thread)

### GPS Antenna Mount for Self-Levelling Range

Single mount for installing an additional GPS / VHF antenna above the radar on a Self-Levelling Radar Mount install (1" x 14 tpi thread).

### Gantry Mount For PowerTower®

Combined mounting solution for navigation and search lights, GPS and VHF antenna.

**Gantry Mount For Dual PowerTower®**  
Combined mounting solution for all nav and search lights. Mounts anchor lights, all round white lights, steaming and aft lights.

### 4° Base Wedge

Angles your radar down 4° below horizontal providing a level horizon for your radar when the boat is bow's up underway. Fits under PowerTower with a base seal to ensure a watertight install.

### Adjustable Base Wedge

Satcom antennas require a horizontal mounting surface to function correctly. Satcom wedges eradicate this problem by providing a level mounting on slopes from 0° to 12°. Simply counter rotate the angled discs until the top surface is horizontal.

### Lifting Crane

ideal for lifting heavy outboards, luggage, supplies etc on board up to 30kg (66lbs) in weight. Quick release pins allow easy removal for storage.

### Cable Conduit

A neat solution for securing antenna cables down the outside of the mast - simply rivet the back section to the mast, lay the cables in and snap the cover on. Supplied in 1.5m (5') lengths.

### Mast Mount Adapter Kit

For masts with an integral track at the front which makes it difficult to fit a Scanstrut Mast Mount such as Z-Spars, Selden, Isomat and Eurospars Masts.

### Radar Guard

Polished stainless guards protect radome from damage and reduce wear on the sails. Mounted using radome bolts, no extra fastenings required.

### Scanpod Cover

Protect your Scanpod and instruments with a Scanstrut Suncover. UV stable material, pull cord to tighten, sizes to fit all Scanpods.
